1. The Csepel factory is on the island of the same name south of Budapest and no of Szigetszentmiklós, running in a north-south direction along the island. The factory grounds have two main entrances. Near the northern one is the office
building, the research laboratory and the planning office. In front of the office building, the research laboratory and the planning office. In front of the office is a testing road 8 m wide and 6 km long. At the west side of the installation the shops. A normal gauge railroad runs the length of the installation. At east side are a hospital, a meeting hall, an apprentice school and a home for apprentices. Coal and raw materials are stored in the center.
 The machine equipment is partly old, partly modern. The forced pace of the well- leaves no time for preventive maintenance. If machines break down the worker- using them are held responsible.
3. Motors, cars and various types of spare parts are produced. No bodies are mag at this place, those used coming from the Ikarus and Rákosi Mátyás works. No
being produced are Diesel motors, Type 350 for 3-ton trucks, Type 130 for 1.5 ton trucks, Type 200 for 5-ton trucks, Type 300 for 3-ton trucks. Type 350 resembles that of the Steyr Diesel truck. Type 130 is suited to the truck. The other two types are of pure Hungarian construction and are produced especially for the Hungarian Army. Type 350 goes to most of the star industries and also to other Iron Curtain countries.
